Michelle Chen	65406415	u0f7w	hsiangyi1025@gmail.com

Plan before stating M4:

Discuss what needs to be improved with our data structure. Attributes or entities that need to be changed or improved. And then check our plan with TA via the check-in meeting.

Schedule:**(6, November ~ 12, November)**

SQL script to create all the tables and data in the database

Queries: INSERT/DELETE/UPDATE Operation

Queries: Selection/Projection/Join

GUI

(13, November ~ 22 November)

Queries: Aggregation

Queries: Nested Aggregation

Queries: Division

(23, November ~ 25, November)**Include:**

Cover Page

Repository Link

Also needs to be finished:

Project Description

README

The last 3 days we will check what we are missing and need to be improved. (Double check)

Work assign:

Heng: INSERTION, Selection, Description

Wenkai: UPDATE, Projection, Description

Michelle: DELETION, Join, Readme

Together: SQL, Nested Aggregation, Aggregation, Division, GUI

Challenge:

The first part is the GUI, we are not familiar with the user interface so it might take some time to implement.

Second, the aggregation requirement. In our current project we do not have any aggregation, do we need to add an aggregation or we can just leave it? Will check with TA and see if we need to include this part.
